myEWB User Stories

What follows is a fairly granular list of myEWB user stories, or "things people can do through the myEWB user interface", although I've deviated from that where appropriate. The purpose of this list is to facilitate communication around what 'features' should or shouldn't land in which iteration of myEWB X development (for X=1.5, 2.0 etc) and as such breaks out lots of dependent/composite things into their own line item so they can be prioritized separately if desired. Each line specifies what can be done by a different Actor (Guest, User, Sender, Leader, Exec, Admin), which is not necessarily a different person; a given person can wear multiple Actor hats simultaneously. Sender/Leader/ Exec Actors get special abilities only with respect to whatever group they hold their Actor hat for. I haven't gone to great lengths to detail what can and can't be 'seen' by various Actors, so I'll let Francis answer and questions about what is meant by the word 'visible' in various contexts. I also got bored near the end and didn't actually flesh out CHAMP and the Volunteering tab. If it's useful I can.

1. Guest can see a list of publicly visible posts

2. Guest can filter list of publicly visible posts by tag in a tag cloud

3. Guest can see who's online

4. Guest can subscribe to RSS feed of publicly visible posts (w/ or w/o replies)

5. Guest can see list of publicly visible hot/featured posts

6. Guest can subscribe to RSS feed of publicly visible hot posts (w/ or w/o replies)

7. Guest can subscribe to RSS feed of publicly visible posts by tag

8. Guest can search for posts by keyword, with results sorted by relevancy

9. Guest can search for posts by author name

10. Guest can search for posts limited by date-range

11. Guest can search for whiteboards keyword, with results sorted by relevancy

12. Guest can search for whiteboards by author name

13. Guest can search for whiteboards limited by date-range

14. Guest can search for events by keyword, with results sorted by relevancy

15. Guest can search for events limited by date-range

16. Guest can view a post

17. Guest can click on email addresses in post body

18. Guest can view a post's replies

19. Guest can view a post's whiteboard

20. Guest can view a printable version of a post

21. Guest can view list of files attached to a post and download files

22. Guest can view list of files attached to a post with icons and file-sizes

23. Guest can view images attached to a post in a faux-modal dialog

24. Guest can view limited profile of any user who has posted anything or is an executive

25. Guest can view list of posts of any user

26. Guest can sign up and become User

27. Guest can join a chapter on signup

28. Guest can pay membership dues on signup (hidden page)

29. Guest/User can reset password

30. Guest can display chapter list

31. Guest can see chapter locations on a map on chapter list

32. Guest can subscribe to mailing lists by email address alone

33. Guest can display chapter info

34. Guest can subscribe to chapter events calendar ical feed

35. Guest can view list of chapter executives

36. Guest can view list of public chapter mailing lists, including recent usage

37. Guest can view list of NO staff

38. Guest can view list of public mailing lists

39. Guest can unsubscribe from all mailing lists by email address (only if user has never signed in)

40. Guest can view whiteboard of public mailing lists

41. Guest can view list of files attached to a whiteboard and download files

42. Guest can view list of files attached to a whiteboard with icons and file-sizes

43. Guest can view images attached to a whiteboard in a faux-modal dialog

44. Guest can subscribe to RSS feed of public mailing lists

45. Guest can view public mailing list archives (including posts, not just emails)

46. Guest can view chapter event calendars

47. Guest can view list of upcoming publicly visible events

48. Guest can filter events by tag

49. Guest can view an event

50. Guest can view an event's whiteboard

51. Guest can export an event to iCal format

52. Guest/User can sign in

53. User can sign out

54. User/Guest can send feedback to site admins through form

55. User can do almost anything Guest can do

56. User can use myEWB chat

57. User can quickly see number of new posts since previous sign-in

58. User can quickly see number of new replies since previous sign-in

59. User can quickly see number of new whiteboard edits since previous sign-in

60. User can see list of new posts/replies since previous sign-in

61. User can see list of new whiteboard edits since previous sign-in

62. User can reorder list of posts by post-date or last-reply-date

63. User can transparently has latest list ordering saved for next time

64. Exec can view list of all posts in chapter (turn on exec-o-vision)

65. Exec can transparently have exec-o-vision prefs saved for next time

66. Admin can view list of all posts (turn on admin-o-vision)

67. Admin can transparently have admin-o-vision prefs saved for next time

68. User can see number of replies to a given post since last sign-in

69. User can add a post to their watch-list from any post-list page

70. User can add a post to their watch-list from any post-list page with no page-reload

71. User can display their post-list

72. User can remove posts from their watch-list

73. User can remove posts from their watch-list with no page-reload

74. User can set pref to have replies to watch-listed posts emailed to them

75. User can set pref to have replies to watch-listed posts emailed to them with no page-reload

76. User can create a post with a subject and body

77. User can create clickable links/emails in post body text

78. User can format post body text

79. User can specify post 'intro' text

80. User can specify that a post will have reply- or whiteboard-functionality

81. User can attach a file to a post

82. User can attach multiple files to a post

83. User can attach tags to a post

84. User can specify visibility-level of a post explicitly

85. User can specify visibility-level of a post implicitly by reaching new-post page from a special link

86. User can reply to a post

87. User can attach file to a reply

88. User can attach multiple files to a reply

89. User can add tags to a post when replying to it

90. Leader can delete post

91. Admin can add post to hot-list

92. Admin can add post to hot-list without page-reload

93. Admin can remove post from hot-list

94. Admin can remove post from hot-list without page-reload

95. Admin can view system-usage graphs

96. User can see site-wide announcements

97. User can close site-wide announcements

98. User can have site-wide announcement closure pref stored for remainder of session

99. Admin can set per-group site-wide announcements (not through the UI, but it can be done)

100. User can view user-specific announcements as a reminder to take certain account actions

101. User can view a list of own posts

102. User can update/flesh out their profile info

103. User can pay membership dues

104. User can have address/other info prepopulated when paying membership dues

105. User can have address/other info resaved to profile when paying membership dues

106. User can have address strongly validated if in Canada/US when updating profile/ paying membership dues

107. User can fill out student-status-specific info

108. User can completely delete account

109. User can attach photo to account

110. User can delete account photo

111. User can fill out 'public profile info'

112. User can view other users' public profile info on the profile page of any exec or anyone who's ever posted anything

113. User can view any exec's email address on exec's profile page

114. User can change password

115. User can join any single chapter

116. User can join any visible mailing list

117. User can leave a chapter

118. User can view list of posts in a chapter collated with posts in visible chapter-groups

119. User can unsubscribe from a mailing list

120. User can see subscribed-to mailing lists

121. Sender can do anything User can

122. Sender can send email (subject/body) to a mailing list

123. Sender can create clickable links/emails in email text

124. Sender can format email text

125. Sender specify which email address to send 'from' when sending email to mailing list

126. Sender can specify replies or whiteboard when sending email to mailing list

127. Sender can attach file to email sent to mailing list

128. Sender can attach multiple files to email sent to mailing list

129. Sender can attach tags to archive-post of email when sending email to a mailing list

130. User can view list of files in group file-share

131. User can view list of files in group file-share with icons and file-sizes

132. Sender can upload files to group file-share

133. Sender can delete files from group file-share

134. Sender can create directories in group file-share

135. Sender can create event with name/date

136. Sender can specify event start time on date

137. Sender can specify event duration

138. Sender can specify event description

139. Sender can create clickable links/emails in event text

140. Sender can format event text

141. Sender can activate event whiteboard

142. Sender can attach tags to event

143. Sender can specify event visibility explicitly

144. Sender can specify event visibility implicitly by arriving at new-event page when following a special link

145. Sender can send an email reminder of an event with link to event listing

146. User can edit a whiteboard

147. User can create clickable links/emails in whiteboard text

148. User can format whiteboard text

149. User can attach file to whiteboard

150. User can attach multiple files to whiteboard

151. Leader can do anything Sender can do

152. Leader can batch-add users to mailing list

153. Leader can batch-remove users from mailing lists

154. Leader can batch-upgrade users to sender of mailing list

155. Leader can batch-upgrade users/senders to leader of mailing list

156. Leader can batch-downgrade leaders/senders to user of mailing list

157. Leader can batch-downgrade leaders to sender of mailing list

158. Leader can view list-membership spreadsheet

159. Leader can edit mailing-list welcome email

160. Leader can view list-membership graph

161. Exec can do anything Leader can do to any group in their own chapter

162. Exec can search for members in their own chapter

163. Exec can view detailed info for members in their own chapter

164. Exec can upgrade members to regular

165. Exec can downgrade members from regular

166. Exec can upgrade user to exec

167. Exec can downgrade user from exec

168. Exec can edit other execs' titles

169. Exec can create mailing list within their own chapter

170. Exec can edit list description/name/visibility

171. Exec can archive mailing list

172. User can see archived mailing lists

173. Exec can manage email forwards

174. Exec can use CHAMP

175. Exec can view chapter graphs

176. Exec can delete event

177. Exec can promote user to National Rep

178. Exec can demote from National Rep

179. Exec can edit other National Reps' titles

180. Exec can download user info as vCard

181. Exec can edit chapter contact info

182. Exec can view upgrades spreadsheet

183. Exec can view all-exec contact list spreadsheet

184. Exec can view presidents' contact list spreadsheet

185. Exec can view chapter spreadsheet

186. Admin can do anything Exec can do

187. Admin can delete user

188. Admin can impersonate user

189. Admin can manager user's email information

190. Admin can promote user to admin

191. Admin can demote user from admin

192. Admin can edit other admins' titles

193. Admin can subscribe users to main list

194. Admin can choose to send donor email when adding to main list

195. Guest can sign up to main list from EWB.ca

196. Guest can sign up to main list when donating through EWB.ca

197. Admin can send email as info@

198. Admin can silently mass-delete never-signed-in users

199. Admin can create chapter-less mailing lists
